SUMMARY

Software Engineer with a strong focus on the frontend and full stack. With 2+ years of experience, specializing in leveraging React.js, TypeScript, and modern web technologies to build scalable and responsive applications.

PROFESSIONAL EXPERIENCE

SAMCO SECURITIES LIMITED, Chennai, India **Jul 2023 - Present**

Software Engineer (Web)

Skills Associated: React.js, Typescript, Graphql, Material UI

- Involved in developing a fully responsive trading platform for Samco Trading web application using React.js & delivered multiple versions with new features, ensuring seamless cross-device compatibility.
- Provided production support by debugging and resolving issues, ensured cross-browser compatibility, and assisted in deployment of the application to production.
- Configured Apollo Client for GraphQL to handle dynamic data requests and collaborated with the middleware team on API query integration.
- Built multiple POC for the web application features involving Drag and Drop and different Chart with libraries Chart.js & React DnD for application functionality.

PROJECTS

Revamp - Samco 3.0 Trading Web Application **Jul 2023 - Jul 2025**

Software Engineer - Samco Securities Limited (Onsite)

- Integrating real-time market updates and implementing a modular component architecture, I was able to optimize rendering and significantly improve platform performance and page load times for thousands of users.

Market Symbol Event Calendar **Feb 2023 - Apr 2023**

Software Intern- Samco Securities Limited (Onsite)

- Built and deployed a dynamic Event Calendar in a production environment that surfaced critical financial events (earnings, dividends, splits, corporate actions) for market symbols, improving investor visibility and decision-making.

Queue based Recommendation | (Music)

Github: https://github.com/Saravanakumar-v/Spote5-Music-Recommendation

Skills Associated: HTML, CSS, Javascript, Python (Flask), Jupyter Notebook

- Developed a web application that allows users to build a dynamic music queue via form input, feeding into a content-based recommendation model.
- Used Python (Flask) to handle frontend inputs and deliver personalized song suggestions in real-time.

EDUCATION

Sri Venkateswara College of Engineering (SVCE), Chennai **Jul 2019 - Jun 2023**

Bachelor of Engineering, Computer Science
